

# Want to be **green** and **lean** for **FREE?**

## Be sustainable and save money by being kind to the environment...

Whilst being green is important, businesses also need to be efficient. CQ TAFE is offering two free competencies for employees and managers that teach you to be kind to the environment while saving you money:

The **Participate in environmentally sustainable work practices (BSBSUS201A)** unit, gives workers the skills and knowledge to:

- assess their environmental performance
- minimise environmental risk
- promote efficient production and consumption of natural resources
- minimise waste
- seek alternative energy sources

The **Implement and monitor environmentally sustainable work practices (BSBSUS301A)** unit is a more advanced unit.

It allows workers to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness, looking in detail at areas including:

- ecological footprinting
- supply chain management
- renewable energies
- reducing chemical use
- various Australian Government green initiatives

The application of the knowledge acquired from the successful completion of the unit can potentially increase productivity and reduce costs to an organisation.

These competencies are online and available 24/7 so **ENROL NOW!**
